KEY SKILLS

Languages

Go · TypeScript · Python · Rust

Infra / SRE

Kubernetes · Docker · GitLab CI/CD · n8n · Vercel · Self-hosted

AI / ML

Predictive ML · DSS / SPPR · Human-in-the-Loop · RAG · Model Context Protocol

Web3

Solana · Anchor · Rust smart contracts · RWA tokenization

EDUCATION

Master's Degree

Computing & Software Engineering · D. Serikbaev EKTU
2023 – 2025

Bachelor's Degree

Computing & Software Engineering · D. Serikbaev EKTU
2019 – 2023

LANGUAGES

Russian	Native
English	B2 → C2
Chinese	Studying

Nikita Bulygin

Software Engineer

● Open to Software Engineer roles · remote · bulnik.dev/en

SUMMARY

5+ years building production systems across full-stack, SRE and ML — from corporate platforms and DevOps infrastructure to AI decision-support and Web3.

EXPERIENCE

CURRENT – IN PARALLEL

CTO & Co-founder · Epiq AI

2025 – Present · Astana, KZ
FOUNDING

As CTO & co-founder I set the technical vision for a Data-Driven Decision Support System (predictive ML + Human-in-the-Loop) and build the team to develop and roll it out.

- Built and lead a team of 10 across development and rollouts, establishing engineering processes and culture from zero.
- Designed the DSS architecture with predictive ML models and Human-in-the-Loop feedback, taking the product from concept to a working solution.

Stack: Python · TypeScript · RAG · Qdrant · MCP · Kubernetes

Senior Backend Developer · Nadvan Group

2024 – Present · On-site / Remote
CONTRACT

Senior backend developer at a corporate group: centralized development and owned reliable internal systems under load.

- Built multiple high-load systems — a super-app and internal platforms — consolidating several systems into one reliable product for the whole group.
- Created a unified development & deployment platform — DevOps and CI/CD from scratch — speeding up delivery across teams.

Stack: Go · TypeScript · PostgreSQL · Docker · GitLab CI · n8n

Full Stack Engineer · UKTMP — Titanium-Magnesium Plant

Sep 2024 – Dec 2025 · Öskemen, KZ · On-site
PROJECT

Supported and troubleshoot multiple internal corporate systems — monitored performance, ran user support and authored technical documentation. · Designed custom integration modules and APIs for inter-system communication; optimized data flows and error handling. · Set up R&D dev-environment infrastructure, automated deployment with CI/CD, scaled and managed resources for the R&D team.

Stack: Nuxt.js · Next.js · TypeScript · Node.js · Python · Docker · GitLab CI · PostgreSQL

Tech Lead (Startup) · Tasker

Apr 2024 – May 2024 · Remote
· 2 months
PROJECT

Architected MVP for Clients · Operators · Masters on a single API surface. · Owned infrastructure: GitLab CI/CD, Vercel, monitoring scaffolding. · Validated core flows quickly to inform the next funding decision.

Stack: Go · TypeScript · Next.js · GitLab CI · Vercel

Full-Stack Developer (Independent) · Self-employed

2020 – Present · Remote
INDEPENDENT

Delivered 20+ custom solutions: e-commerce, CRMs, dashboards. · Worked across the full stack — design, backend, deployment, support.

Stack: Next.js · Nuxt · TypeScript · PostgreSQL · Docker
